

## Brandon Medical's Equipment Package

Brandon Medical offers a range of specialist medical equipment designed for your clinical workspace. From bespoke solutions to premium quality products, we can design a tailored package to meet your requirements.

### Medical Lighting

Our expanding range of high quality medical lighting includes Operating Theatre Lights, Minor Surgical Lights and Examination Lights. HD-LED technology is integrated into our Quasar® eLite, Astralite and Astramax surgical lights, which was stated to be the "Best LED in Europe for medical applications" European Elektra Awards 2010. Brandon Medical's Coolview® examination range is designed for virtually any examination procedure including dermatology and consultation.

### Control and Power

We specialise in designing bespoke power supplies and control panels to suit client specific requirements. These include, IPS/UPS systems, BEPU battery packs, Remote Controls and Theatre Control Panels. With simple installation, Brandon Medical's power supplies and control panels, provide a comprehensive solution to your clinical workspace.

### Medical Architectural

Brandon's expertise and capabilities in manufacturing and engineering enables us to supply engineered solutions to each specific project. Our Mediclean® UCV systems are fitted completely flush to the ceiling, and use special particle counters to measure contamination in the sterile area in real-time, to alert staff if air quality is reduced. Our Atlas Pendants® have been designed with virtually unlimited movement and extensive customisation options. Brandon Medical's expertise in design has helped develop the next generation in medical pendants.

### Medical Audio-Visual Systems

Symposia® is a toolkit for digital media solutions designed specifically for healthcare applications. The system connects medical professionals to a range of audio-visual resources which can be accessed immediately from any location. Brandon Medical's HD camera systems are specifically designed for use in the operating theatre. Our unique 'Stable Image' technology eliminates 'Visual Banding' and camera interference normally seen with LED lights. Symposia® is ideal for advanced surgical skills training centres where it is used by experienced surgeons to up-skill and share best practice.
